

Improve Student Listening & Speaking Confidence with the Sanako Range of Digital Language Centres

Oral Assessments Made Easy

The teacher can use the **live audio** feature to ask the **whole class questions simultaneously**, there is no need to work with individual students unless preferred. The students, as a class, simply respond with their answers and the advanced software will collect back each individual student recording, with their name, and save it as an MP3 file to a drive of your choice for later assessment.

Picture Description Activity

The teacher can copy and paste any image into the “Teacher Controlled Playlist” ready to be launched out to all students. When activated the student need to simply describe what they see and the advanced software will collect back all the student’s work as named MP3 files for later assessment

Role Play & Pairing Activity

The teacher can randomly select student pairs to initiate multiple simultaneous target language conversations with the students, group or full class. This will create **live audio** role play activities for the whole class to participate, at all times the teacher can discretely monitor and support students as required or join the pair. At the end of the session the teacher can automatically collect the “paired” recordings of the students for later assessment.
